Dear Sir/Madam

RE: WORK INTEGRATED LEARNING (WIL) PROGRAMME

We are currently seeking organisations that can offer training / workplace experience for our students where they would acquire practical, real-world experience and exercise knowledge gained through their respective qualifications.

Work Integrated Learning is a vital requirement for students to complete their qualification and graduate. Additionally, this serves to bridge the gap between academia and industry.

The minimum duration for the WIL programme is 150 hours (at least 19 working days). However, it would be appreciated if the company could consider subsidising travel and subsistence allowance for the student, at the company's discretion.

The Richfield Graduate Institute of Technology would like to foster a dynamic relationship with your organisation to develop a spirit of co-operation and goodwill that would lead to a skilled workforce thereby contributing to the development of our communities and society at large.

We would appreciate if your organisation can accommodate our students for the WIL program.

Yours faithfully
Richfield Graduate Institute of Technology (Pty) Ltd
